What's New in the?

Portable Muslim Prayer Times is a simple, easy to use,.NET based program designed to display prayer times via your taskbar. It allows you to set the time intervals for the prayer alerts, the colors for various alerts and notifications or the form's transparency. Prayer Times is a simple, easy-to-use,.NET based program that displays prayer times via your taskbar. It allows you to set the time intervals for the prayer alerts, the colors for various alerts and notifications or the form's transparency. Product Description Have you ever wondered why God/Allah has created a day for you to pray 5 times every day, it is because his/her prayers are endless but the length of the day is specific and depends on the time period or day and hour in which the prayer is performed. We are constantly giving the reasons to pray behind our chakatians and we think that we are already close to our creator and lord, but the other side is the fact that we are not closer to him/her as we think. The Prophet says: Whoever prays five times then prays two times and then prays one time then prays and then prays once, and then prays one time then he prays twice and then he prays once again, then he will be taught what he missed. We are praying to our Creator but we do not realize that for whom we are praying and what is the purpose of praying. Our Creator wants us to pray to him/her to be closer to him/her, to know more about him/her and to do good to him/her. Thanks.Two Thousand Years of Human Injustice Two Thousand Years of Human Injustice is a historic book written by Arthur Koestler and published in 1988. The book is part of a wider exploration of the history of mankind's domination of animals and other creatures, and deals specifically with the ways in which oppression and exploitation has happened and has been documented. Much of the book is historical but the experiences

System Requirements:
